

IntelligenceClient (HTTP)

### clmpilot-backend

Domain contexts  
(Go on comby)

REST API and  
OpenAPI export

### clmpilot-intelligence

Extraction service  
(Python)

### clmpilot-frontend

Single-page application  
(Vue 3 + Quasar)

Generated API client

OpenAPI contract  
(client regenerated)

deploys  
version-pinned images

deploys version-pinned  
images

### clmpilot-deployment

Compose stack, reverse proxy  
and service-unit configuration

Operational scripts  
and runbooks

Each repository carries its own CI pipeline (lint + test + build); the three application pipelines end in a version-tagged Docker image published to the container registry.
