

Phase 0 -- Engineering foundations
(repository, CI/CD, dev environment, roadmap)

gate

Phase 1 -- MVP, full stack
(registry, document links, deadlines,
approvals, dashboard, IAM)

gate

Phase 2 -- Enterprise features
(intelligence-assisted extraction, e-signature,
custom fields, obligations, advanced reporting)

designed,
not shipped

«Part 2»

Improvements in the event-sourced system
(broker-communication, multi-tenancy,
scalability of comby and the event store)

Phases 0--2 realised and
shipped to production.
